

B110 **BONNET-BUFF®**

LABEL INSTRUCTIONS

Product Description & Directions for Use:

A low VOC formula concentrate with anti-soil properties for effective spray cleaning of carpets in conjunction with rotary carpet bonnet pads. Bonnet-Buff will effectively encapsulate and release soil, leaving a clean, dry and residue free carpet.

For professional and industrial use only.

Mix 1 part B110 Bonnet-Buff with 16 parts of warm to hot water (300ml per 5 litres of water).

Always pre-test carpet for colour fastness with ready-to-use solution before proceeding.

Apply solution by pressure sprayer fitted with a fan jet at approximately 30 to 40 psi (2 to 3 bar). Do not over wet.

Apply approximately 5 litres of mixed solution over an area of 30 to 50 square metres, depending upon soil level. Follow up with low speed rotary machine with a soil absorbent or micro-fibre bonnet pad. When pad becomes soiled, reverse or soak in warm water and wring out before re-use. For heavier soils, the pad may be pre-soaked in solution then lightly squeezed in a mop wringer before use. Re-set pile with carpet pile brush or groomer rake and replace furniture on pads or blocks.

- Carpet maintenance cleaner with anti-soiling encapsulation agent.
- For use on light to moderate surface soils.
- Ideal for regular, low-cost maintenance of traffic areas in commercial areas.
- Clear liquid with a lemon and lavender fragrance.

pH Concentrate: 9.0

pH Diluted: 9.0

Keep out of reach of children.

Do not get in eyes, on skin, or on clothing.

Wear protective gloves.

IF IN EYES: Rinse cautiously with water for several minutes.

Remove contact lenses, if present and easy to do. Continue rinsing.

Get medical advice / attention.

Safety data sheet available on request.

Please consult the Safety Data Sheet before using this product.
