Fiberdri TM4

Carpet Dry Cleaning System

- The Prochem Fiberdri carpet cleaning system now offers the professional and in-house carpet cleaner a cost effective dry maintenance cleaning method.
- Designed for use on all types of carpet, the machines use contra-rotating brush action to work the dry cleaning compound into the carpet pile.
- The systems can be used in areas during working hours as the carpet is kept dry and the unit has a very low noise level.
- The cleaning and compound pick-up process is automatic with the Renovator system or can be completed by vacuuming to remove the soiled compound.
